

KNEE PRO ULTRA FLEX III

FULL PROTECTION JOINTED KNEE PADS

Incredibly tough, flexible outer shells can withstand extreme heat & cold and are resistant to chemicals.

Knee pads are equipped with soft elastic woven straps & Speed-Clips for quick on/off convenience and easy adjustments while pads are worn.

Unique placement of straps eliminates binding behind knees.

Sections are hinged with metal rivets. They flex with your knees preventing pinching & binding, and they stay in place!

1/2" inner pads cushion knees for greater comfort. Closed cell construction will not absorb moisture!

Non-marking grip strip grabs on most surfaces, even on wet stone & tile!

Lower section is extended for greater comfort and additional protection.

Ideal for use on jobs that require kneeling on hard, slick or abrasive surfaces for prolonged periods.

High-tech design withstands rugged all-day use, yet affords the ultimate in flexible comfort!

**KNEE PRO ULTRA FLEX III
P/N: T9215**

Tactical research yielded a practical solution for every-day knee protection, the "Knee Pro Ultra Flex III", a durable, flexible, hinged knee pad design that withstands rugged all-day use and affords the wearer the ultimate in comfort, safety and protection.
